

e-Infrastructure experiences in regional integration

Prague, 25 March 2009

ICT infrastructures for Science

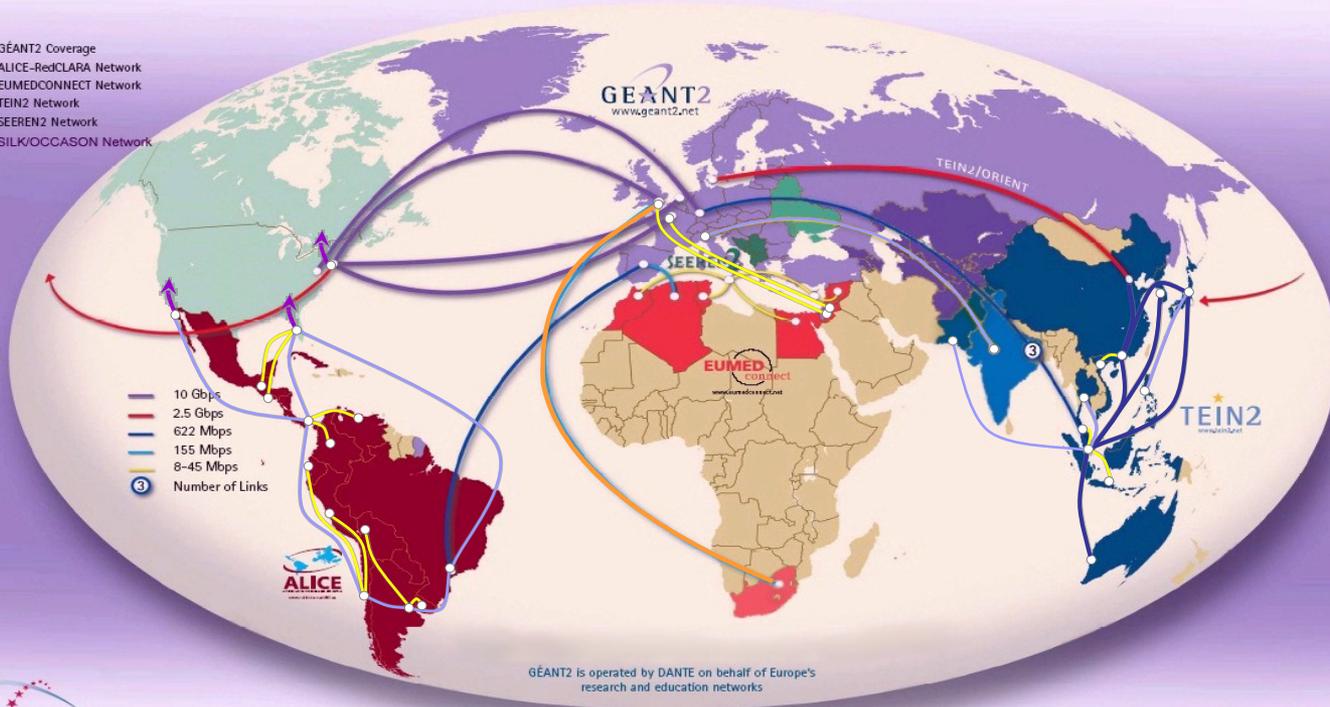

Regional dimension of GÉANT

GEANT2 At the Heart of Global Research Networking

- GÉANT2 Coverage
- ALICE-RedCLARA Network
- EUMEDCONNECT Network
- TEIN2 Network
- SEEREN2 Network
- SILK/OCCASON Network

www.geant2.net

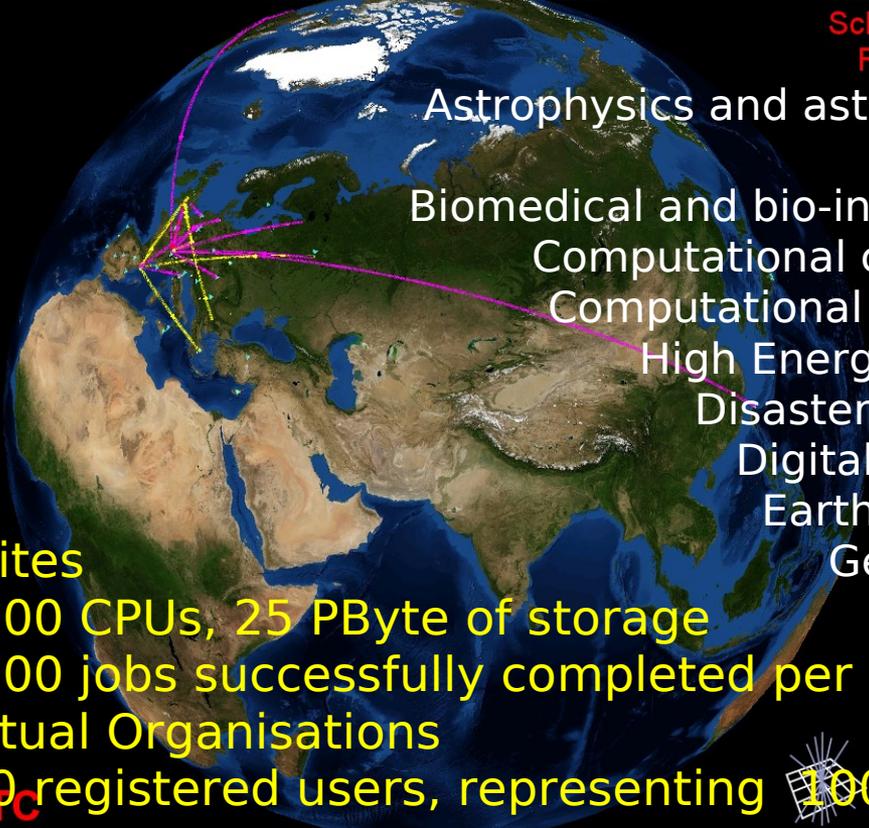

GEANT2 is operated by DANTE on behalf of Europe's research and education networks

★ Connect ★ Communicate ★ Collaborate

EGEE: Tackling Global Challenges

EGEE
Enabling Grids
for E-science

Scheduled = 17356
Running = 18359

- Astrophysics and astroparticle physics
- Biomedical and bio-informatics
- Computational chemistry
- Computational sciences
- High Energy Physics
- Disaster recovery
- Digital Libraries
- Earth sciences
- Geophysics
- Finance
- Fusion

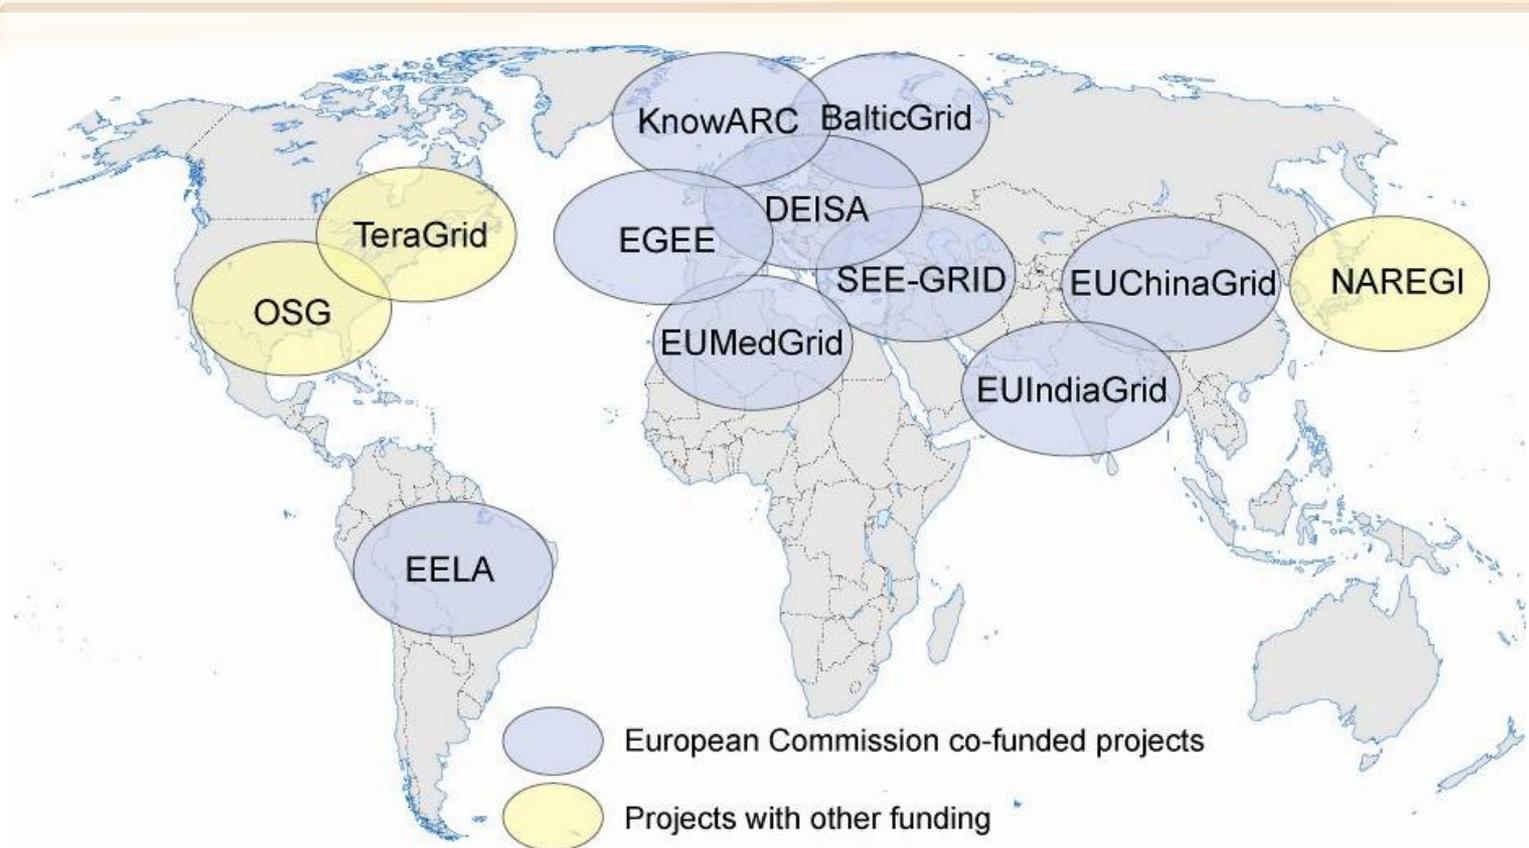

- > 300 sites
- > 100 000 CPUs, 25 PByte of storage
- ~ 300 000 jobs successfully completed per day
- 200 Virtual Organisations
- > 16000 registered users, representing 1000s of scientists

08.54.05 UTC

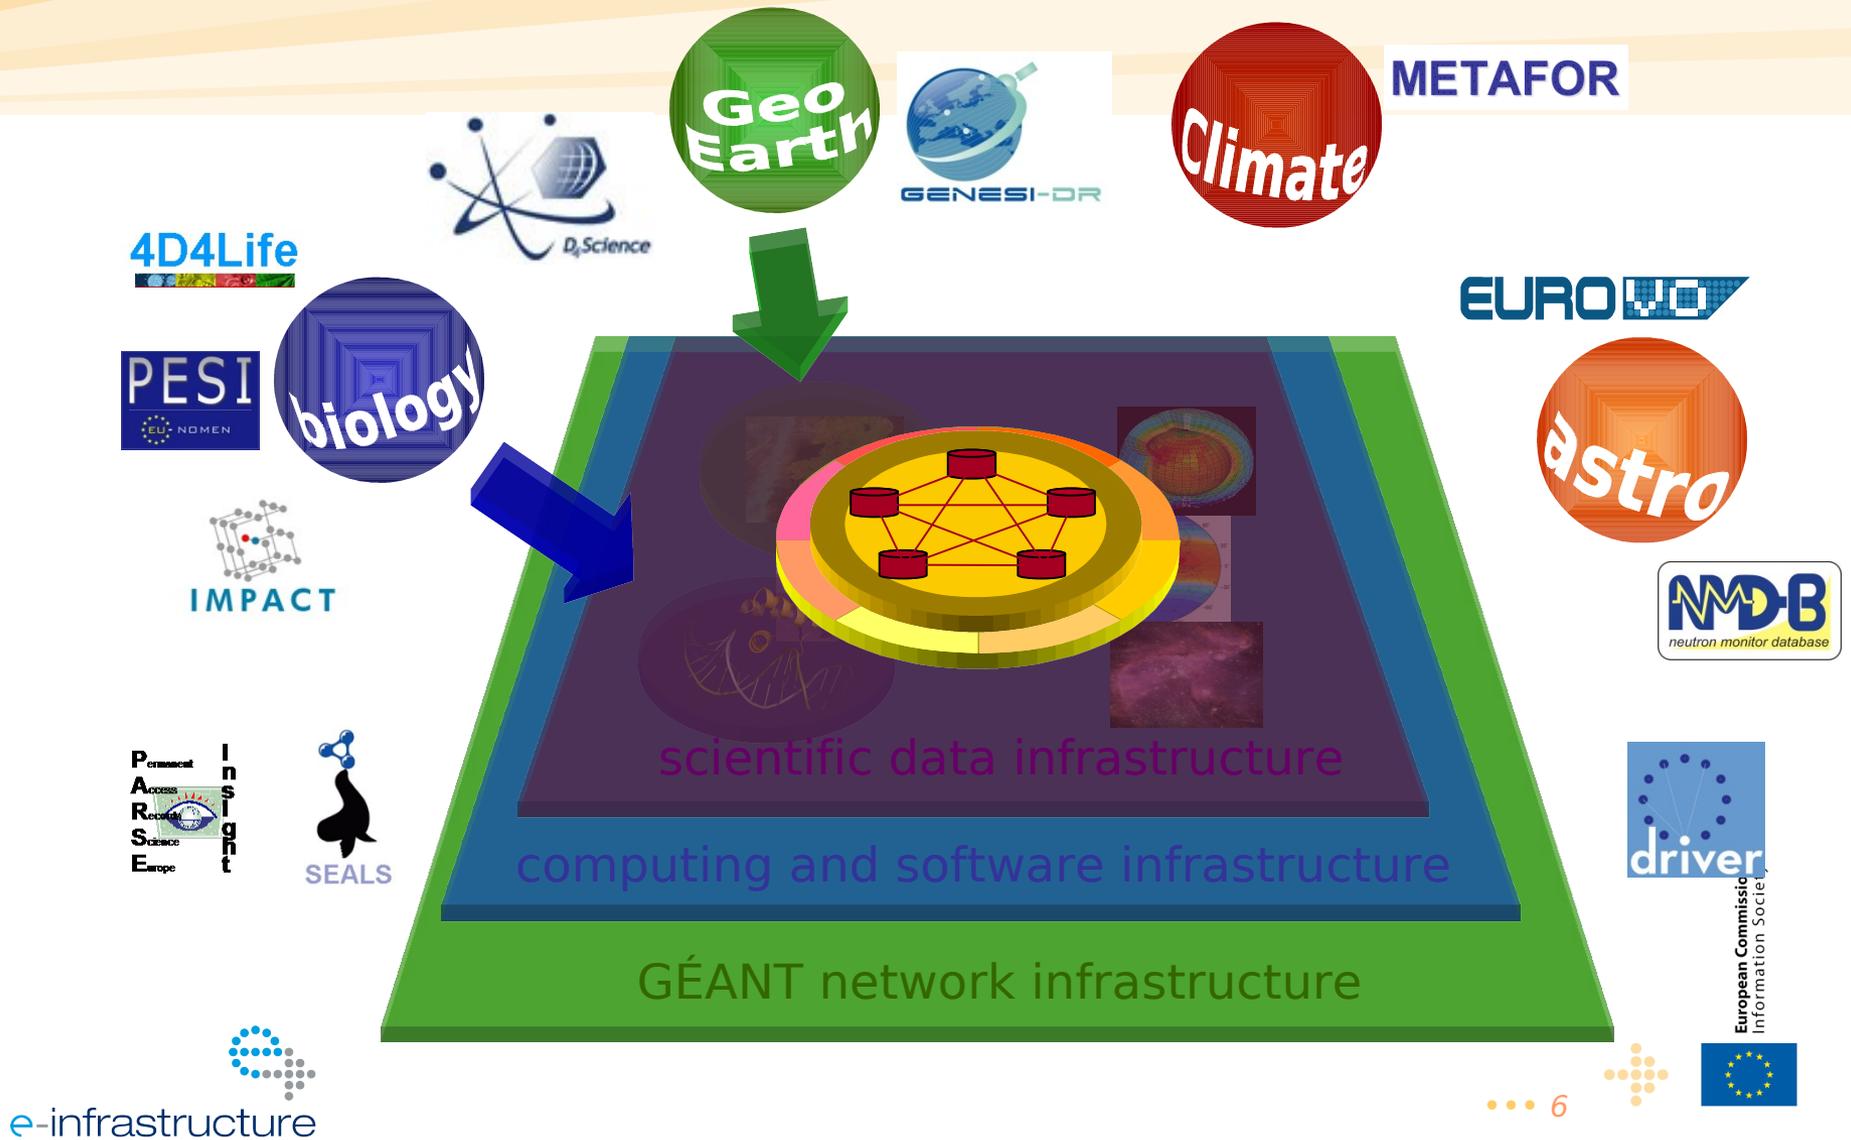

GridPP
UK Computing for Particle Physics

Regional grid projects

Scientific Data Infrastructure

ERA Expert Group on e-Infrastructures

'The vision for a future European Research Area and a coherent RI policy must include the deployment of e-infrastructures, as they are the integrating mechanism, the glue between regions and different scientific disciplines.'

Developing World-class Research Infrastructures for the European Research Area (ERA), Report of the ERA Expert Group, 2008

e-Infrastructures in ERA context

- Remove distance as a barrier
- Enable sharing of resources & knowledge
- Facilitate working together
- Intra-regional integration
- Inter-regional integration
- Emergence of GVRC

e-Infrastructures as a key enabler

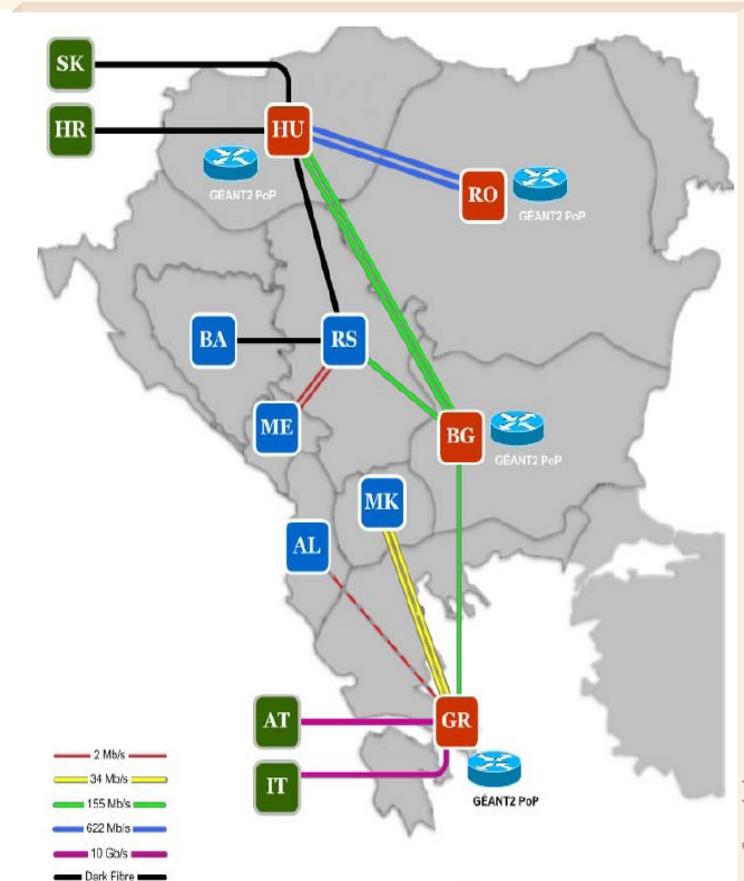

Success Baltic story: BalticGrid

- Set up of grid infrastructure in Baltic region
- Integration of three Baltic countries into the grid landscape (Lithuania, Latvia and Estonia)
- Extension towards Belarus
- Engagement of new user communities (linguistic research, Baltic Sea environmental research...)

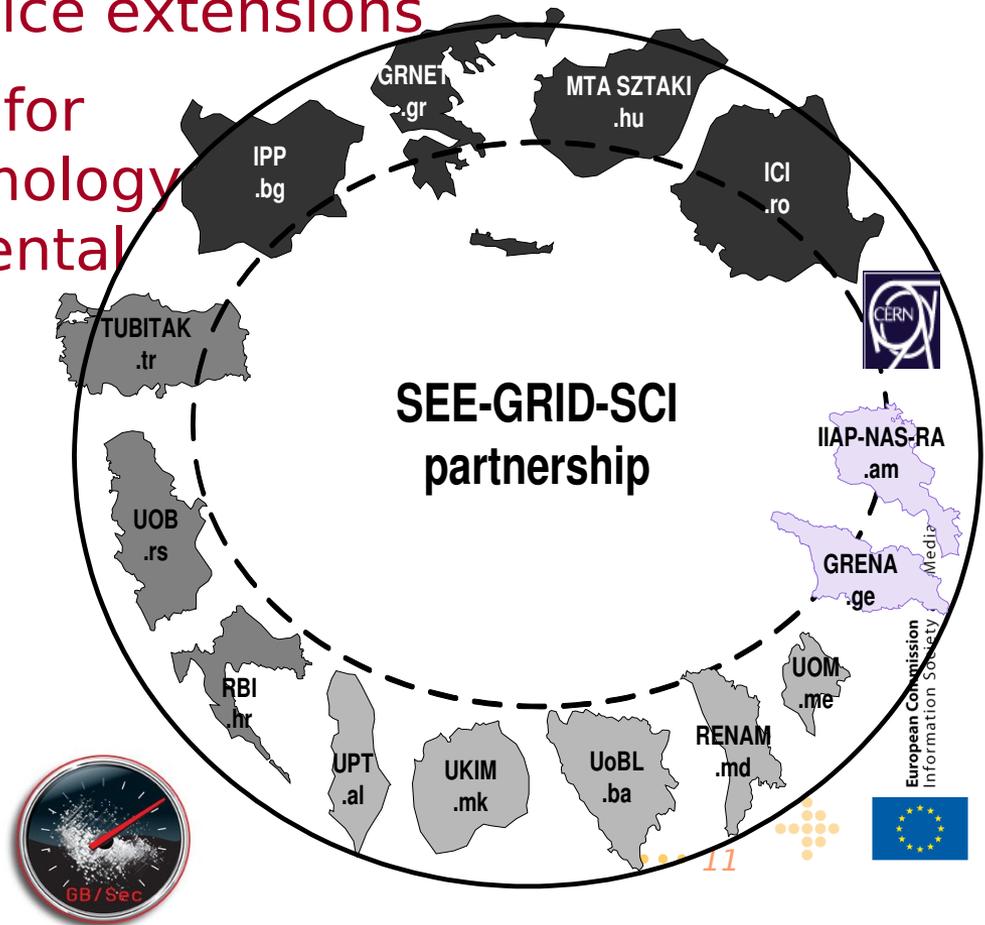

Success Balkan story: SEEREN

- Established the SEE segment of the pan-European GÉANT network
- Connected the research and scientific communities in the region
- Contributed to the definition of the regional and national vision
- Greek Foreign Ministry will continue infrastructure funding over the next 15 years

SEE-GRID

- Infrastructure complementing EGEE
- Engaging regional user communities and providing application-specific service extensions
- Providing infrastructure for new communities (seismology, meteorology, environmental protection)
- Towards long-term sustainability and inclusion in the European Grid Initiative

SEERA-EI

way towards common regional vision

- ERA-NET project to start in first half of 2009
- Collaboration of regional programme managers towards common e-Infrastructure vision and strategy
- Setting the framework for a common regional agenda
- Reduction of fragmentation of national programmes
- Creation of a harmonised approach to national-level initiatives

Global perspective

BBSI
ISBR

South Caucasus Regional network and link to GÉANT, integrating scientific potential in the region

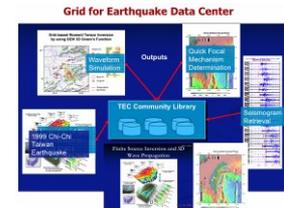

High capacity, production-quality, scalable e-Science grid facility for Europe and

Latin American Disseminate middleware in Asia, support scientific applications and creation of VOs

EGEE

European Commission
Information Society and Media

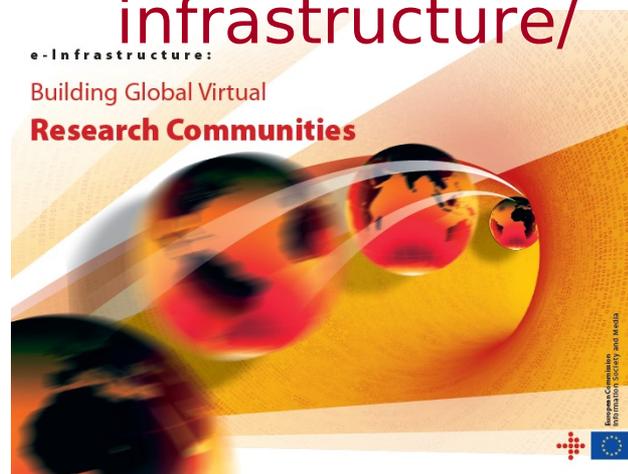

Added value of e-Infrastructures for regional integration

- A tool for collaboration and sharing
 - irrespective of location and distance
- Joining forces to face today's challenges
 - regional and global
- Bridging the digital divide
- Fighting the “brain-drain”
