

## **e-Infrastructure projects in Africa**

# **Promoting Africa-EU Research Infrastructure Partnerships - Paerip High-level Conference**

March 7-8, 2013

Brussels, Belgium

**Kostas Glinos – HoU e-Infrastructures  
European Commission - DG CONNECT**

## *Global dimension of e-infrastructure:*

- *Enabling global research collaborations (global virtual research communities)*
- *Enabling access to unique facilities & data*
- *Supporting broader European policies (e.g. aid to developing countries)*

***the more people, machines and data are connected the more value of research (e-Infrastructure externalities)***

## ***AfricaConnect***

*a high-capacity internet network for academic and scientific collaboration for sub-Saharan Africa.*

## ***Chain-REDS***

*Co-ordination & Harmonisation of Advanced e-Infrastructures for Research and Education Data Sharing*

## ***eI4Africa***

*Exploiting e-Infrastructures potential to boost RTDI in Africa*

## ***iMentors***

*A one-stop-shop data warehouse on e-infrastructures in Africa*

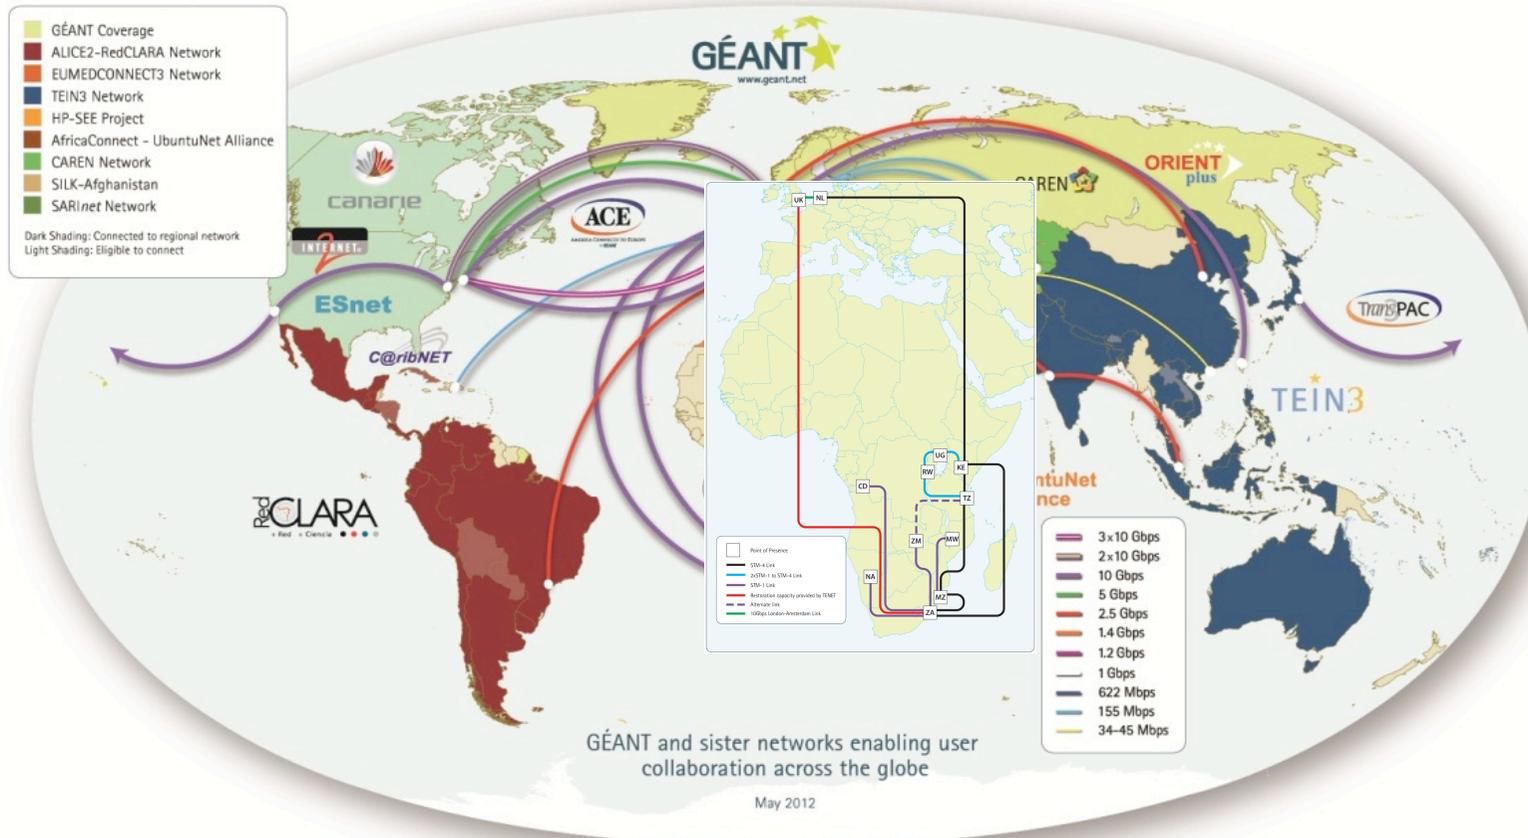

# AfricaConnect joins the Global R&E Village

European Commission

## GÉANT At the Heart of Global Research Networking

# AfricaConnect Background & progress

- 14.75M€ costs over 4 years from 2011, 80% (EC - DG DEVCO):20% (Ubuntunet Alliance)
- Coordinated by DANTE - based on the experienced gathered in ALICE, EumedConnect, CAREN and TEIN
- Adapted to African context through close collaboration with Ubuntunet Alliance and the African NRENs
- Geographic scope focuses on Ubuntunet Alliance, but clear commitment with West Africa - WACREN and AAU
- Manpower mainly provided by the Ubuntunet Alliance

## Progress

- ~40% of the African contribution collected
- Connectivity Procurement: in contract negotiations with provider(s)
- Equipment Procurement: Best and Final offers

- 24 months from 1/11/2012
- EC contribution 920 k€

- Boost the RTDI potential of African e-Infrastructures

- Support Euro-African cooperation & policy dialogues in the framework of the joint Africa-EU Strategic Partnership (JAES):

‘trade, regional integration and infrastructures’ (Partnership 3)

- ‘science, information society and space’ (Partnership 8)

## TEAMING-UP FOR EXPLOITING E-INFRASTRUCTURES' POTENTIAL TO BOOST RTDI IN AFRICA

el4Africa is a FP7 project funded by the European Commission (DG CONNECT) under the 'Capacities Programme' and spanning 24 months (November 2012 - November 2014) with the aim of boosting the Research, Technological Development and Innovation (RTDI) potential of African e-Infrastructures and to support policy dialogues and Euro-African cooperation in the framework of the joint Africa-EU Strategic Partnership on 'trade, regional integration and infrastructures' (JAES Partnership 3) as well as the Joint Africa-EU Strategic Partnership on 'science, information society and space' (JAES Partnership 8).

**OBJECTIVES**

- 1 Define and implement a structured multi-channel outreach strategy to support the development of African national and regional research and education networks (NRENs), build cooperation between Euro-African NRENs, RERs and user communities, raise awareness at policy level on the benefits and value of research and education networks, and promote and strengthen Euro-African collaborative research on e-Infrastructures and their applications.
- 2 Produce a state-of-the-art study of e-Infrastructure application uptake in Africa to identify who are early adopters of e-Infrastructures (providers) and which user communities are early beneficiaries (consumers) of e-Infrastructures.
- 3 Select existing flagship demonstrations from other continents and illustrate their relevance to the African context in order to stimulate policy dialogue on e-Infrastructures.
- 4 Stimulate targeted policy and regulatory discussions, including (but not limited to) cross-border connectivity and affordable access to infrastructures by organising awareness raising flagship African e-Infrastructure application demonstrations.

**ABOUT e-INFRASTRUCTURES**

The e-Infrastructure activity, as a part of the EC Research Infrastructures programme, focuses on ICT-based infrastructures and services that cut across a broad range of user disciplines. It aims at empowering researchers with an easy and controlled online access to facilities, resources and collaboration tools, bringing to them the power of ICT for computing, connectivity, storage and instrumentation. This allows for instant access to data and remote instruments, in-situ experimentation, as well as the setup of virtual research communities (i.e. research collaborations formed across geographical, disciplinary and organisational boundaries).

**Project Acronym:** el4Africa  
**Full Official Name:** Teaming-up for exploiting e-Infrastructures' potential to boost RTDI in Africa  
**Grant Agreement:** 312582  
**Funding Scheme:** Support Action (SA)  
**Programme:** 7th Framework Programme (FP7) / Capacities Specific Programme  
**Theme:** Research Infrastructures / e-Infrastructures  
**Thematic Area:** INFRA-2012-2 / Supporting policy awareness & programme implementation  
**Call Identifier:** FP7-INFRASTRUCTURES-2012-1 (call 10)  
**Duration:** 24 months (November 2012 - November 2014)  
**EC Project Officer:** Gonzalo Plaza / e-Infrastructures Unit/DG CONNECT  
**Coordinator (CO):** Harald Invernig (UK), CONECT (Toronto), COMETA (Rome), NI (Dresden), KTH (Sweden), REKENCENT (Poznan), Sigma Orionis (Paris), UBUNTUNET (Nairobi), WACHEN (China)

# PROJECT OBJECTIVES

**Support the development of African NRENs/RENs ■ Build cooperation between Euro-African NRENs, RENs & user communities ■ Raise awareness at policy level on the benefits & value of REN ■ Strengthen Euro-African collaborative research on e-Infrastructures & their applications**

**Study e-Infrastructure application uptake in Africa to identify who are early adopters of e-Infrastructures (providers) & which user communities are early beneficiaries (consumers) of e-Infrastructures**

**Select existing flagship demonstrations from other continents & illustrate their relevance to the African context in order to stimulate policy dialogue**

**Stimulate targeted policy and regulatory discussions, including cross-border connectivity and affordable access to infrastructures**

# Chain-REDS

- 30 months from 1/12/2012
  - EC contribution 1.5M€

*Coordinator*

*Other partners*

# Action lines

## DCI

### Distributed Computing Infrastructure

- Provide ongoing support of the DCI road-map for intercontinental DCI collaboration, specified within the CHAIN project

## ROC

### Regional Operation Centres

- Support stability of existing and emerging Regional Operation Centres. Cooperate with other projects & initiatives (e.g. AfricaConnect, TEIN3) to support the development of eInfrastructures and key VRCs in Africa, Asia, Latin America and the Middle-east

## Cloud

### For Research and Education

- Support for coordination of Cloud developments for Research & Education with other regions (e.g. China, India, Latin America)

## Data

### Infrastructures and Repositories

- Extend the CHAIN Knowledge Base with information on Data Infrastructures: collecting issues, best practices and identifying data repositories of direct interest for VRCs  
Support the study of data infrastructures for a target subset of VRCs (e.g. Agriculture, Climate Change, Health, Biomedicine, etc.)

## SG

### Science Gateways

- Promote the usage of Science Gateways as a means for attracting new communities and promote the use of eInfrastructures for every researcher

## IDF

### Federations of Identity Providers

- Foster the creation of Identity Federations in cooperation with Certification Authorities; promote and coordinate their usage. Support integration of different AA approaches

- 30 months from 15/04/2012
  - EC contribution 970 k€

*Building a comprehensive virtual observatory with up-to-date information on all ICT/e-infrastructure initiatives of the past 5 years;*

- **A comprehensive database (+ a dynamic Map) with complete information on organisations, research infrastructures, and ICT projects in Africa**
- **A multi-stakeholder evaluation framework to assess the impact of e-infrastructures and a decision support system to identify potential synergies by linking existing projects to upcoming proposals**
- **A social hub with user profiles to facilitate interaction and knowledge sharing and to improve collaboration between stakeholders**

*Enhancing the effectiveness and coherence of international actors involved in development projects in Sub-Saharan Africa*

*The project rests on 3 pillars:*

**Build the ecosystem:** Launch the platform and create a rich stakeholder's ecosystem on ICT based initiatives in Sub-Saharan Africa;

**Establish the platform:** customize existing tools and integrate information adding value through the decision support and GIS functionalities

**Sustain iMentors:** Add value to stakeholder community by improving impact on investment and placing iMENTORS as the main resource hub to view ICT and e-infrastructure projects

*The Alpha Version of the platform is already operational; the Beta Version will be released to the public in **July 2013**.*

# Why going regional with e-Infrastructures?

## ***critical mass***

*(investments, people, ..)*

## ***leveraging effect***

*(e.g. clear policy, legal and regulatory frameworks influence communication markets)*

## ***solidarity and mutuality***

*(bridge geographical and digital divide and foster cooperation with fair -not equal- share of costs)*

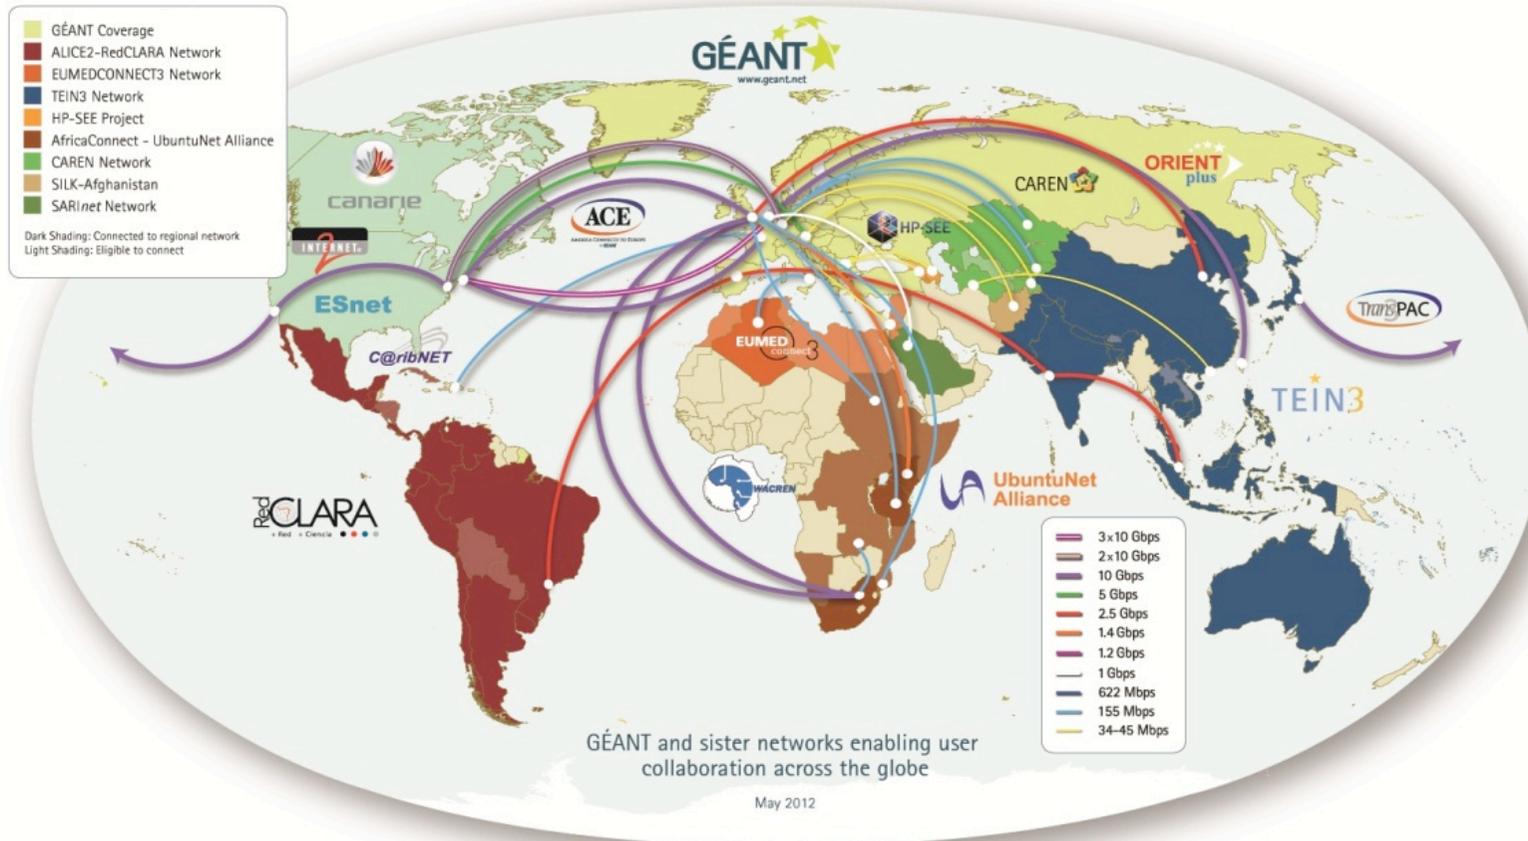

## ***enabling local operational capacity***

*empowering local communities with technical, management and administration skills*

# AfricaConnect joins the Global R&E Village

## GÉANT At the Heart of Global Research Networking

connect • communicate • collaborate
